Hiring Manager
IFS
Sri Lanka

Subject: Application for Software Engineer – Intern Position

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer – Intern position at IFS. As a third-year undergraduate pursuing a degree in Information and Communication Technology at General Sir John Kotelawala Defence University with a GPA of 3.7, I am eager to apply my technical skills and passion for software engineering within a globally recognized and innovative technology company like IFS.

Throughout my academic journey and personal projects, I have developed strong hands-on experience in backend and full-stack development. I am proficient in technologies such as the MERN stack, Flask, and FastAPI, with additional exposure to Django and React.js. My primary programming languages are Python and JavaScript, and I have working knowledge of cloud platforms like AWS. Additionally, I regularly practice Agile methodologies, version control with Git, and implement secure authentication systems such as OAuth and JWT.

What draws me to IFS is your reputation for delivering intelligent and agile enterprise software solutions to businesses worldwide. I am particularly inspired by your focus on innovation, cloud-native technologies, and your people-first culture. I am confident that my technical foundation, eagerness to learn, and collaborative approach would allow me to contribute effectively to your development teams.

Please find my CV attached for your consideration. I would appreciate the opportunity to discuss how I can contribute to IFS's mission and further grow as a software engineering professional.

Thank you for considering my application.

Best regards,
Vinura Nanayakkara
